

**STopping Aminosalicylate Therapy in Inactive Crohn's Disease (STATIC) Study:
A Randomized, Open-label, non-inferiority Trial**

September 2018

Volume 10

STATIC Website Portal: www.static-trial.com

The STATIC website and investigator portal is key for useful site documents, as well as current and past newsletters.

***STATIC is looking to grow!
We have only two sites
left in startup in Canada.
If you know of a site that
might like to get involved,
let Lee or Kathleen know.***

***Thank you
everyone for your
continued
recruitment
efforts !***

***Number of sites
activated:***

❖ 13

***Number of
patients
randomized:***

❖ 21

***A potential STATIC
participant needs 75%
compliance with their
current regimen of 5ASAs
to be considered for
inclusion in the trial***

The STATIC Trial is going international. The UK submission is currently under review

Pregnancy and the STATIC trial

As always, the participant's health and safety, and that of their child, is of paramount importance. A patient that becomes pregnant during the STATIC trial is welcome to continue unless they, or their doctor decide that this may adversely affect their pregnancy outcome or overall health.

IBM clinical updates:

You may have noticed the way queries look in IBM clinical has changed recently. Queries will continue to be answered as before. If anything unusual comes up, please inform Grace.Karugu@robartsinc.com

**** Martin Foster joins the STATIC team as a data coordinator Martin.Foster@robartsinc.com***

The STATIC Clinical Research Associate, Kathleen Walker, is now Kathleen MacNeil

Urine storage containers and labels have been received by Robarts and will be sent out to sites as soon as possible. Containers will be priority shipped to site based on recruitment numbers.

Future Out of Office: Lee Williamson will be unavailable from October 4th-9th
